

Nature Tots - Spring 2017

Spring into science with our fun learning series for kids ages 2-4 with an adult. Each week features activities that may make a mess, so dress accordingly. Remember, you must stick to your session (am or pm), but you may pick the 5 or 7 sessions to attend. Need to add a session? Just email the Education Office at camps@greensboroscience.org. Registration is required at www.greensboroscience.org.

- 1. Bubble Trouble** **January 31**
Explore basic bubbles and beyond. Make bubble art and see how long you can hold bubbles filled with puffs of "fog."
- 2. Groundhog Day** **February 7**
Let's explore shadows and predict if the groundhog will see his shadow. We'll make a groundhog craft and meet a furry friend.
- 3. Happy Valen-slimes Day!** **February 14**
Learn about our pumping organ with some exercises and healthy snacks. We'll listen to our hearts and make a slimy Valentine craft.
- 4. Hooray for Hedgie** **February 21**
Get cozy on this day that celebrates children's author Jan Brett. We'll create some winter crafts and meet some animals from her stories.
- 5. Take Flight** **February 28**
Blast off with stories of constellations, planets and space travel. Then make an air-powered rocket to shoot the moon!
- 6. Penguin Parade** **March 7**
Wear black and white for our formal introductions to penguins. We'll explore birds and eggs, take home a penguin craft and visit the penguins in the Aquarium.
- 7. Seafest!** **March 14**
Let's learn about the oceans and what lives in them. We'll talk about seaweed, jellyfish and sharks and make a fish to take home.
- 8. Bug Olympics** **March 21**
Are you stronger than an ant? Jumper than a flea? Find out and also meet some of our gentle 6 and 8-legged friends.
